

## Domestic Annals of Scotland, Vol. 1: From the Reformation to the Revolution (Classic Reprint)

Excerpt from Domestic Annals of Scotland, Vol. 1: From the Reformation to the Revolution It has occurred to me that a chronicle of domestic matters in Scotland from the Reformation downwards - the period during which we see a progress towards the present state of things in our country - would be an interesting and instructive book. History has in a great measure confined itself to political transactions and personages, and usually says little of the people, their daily concerns, and the external accidents which immediately affect their comfort. This I have always thought was much to be regretted, and a general tendency to the same view has been manifested of late years. I have therefore resolved to make an effort, in regard to my own country, to detail her domestic annals - the series of occurrences beneath the region of history, the effects of passion, superstition, and ignorance in the people, the extraordinary natural events which disturbed their tranquillity, the calamities which affected their wellbeing, the traits of false political economy by which that wellbeing was checked, and generally those things which enable us to see how our forefathers thought, felt, and suffered, and how, on the whole, ordinary life looked in their days. Nor are these details, broken up and disjointed as they often are, without a useful bearing on certain generalisations of importance, or devoid of instruction for our own comparatively enlightened age. A good end is obviously served by enumerating, for example, all the famines and all the pestilences that have beset the country; for when this is done, it becomes evident that famine and pestilence have been connected in the way of cause and effect. For the astronomer, the meteorologist, and the naturalist, many of the accounts of comets, meteors, and extraordinary natural productions here given, must have some value. About the
